

K-95/KERMIT INSTRUCTIONS

Immediately before choosing the last menu option (Print Procedure File) press the {TAB} key. On Printer #1-type the default location for the report to print to, ie: /v1/home/login name/prcreport (prcreport or whatever you want to name the file) enter then hit the 'F2' key.

Print your report, the report will not print, it will go to the default location you named above, /v1/home/login name/prcreport file instead of printing. Hit 'F10' key to get to brackets...and do the following...

- ll (enter) to make sure file is there)(alpha characters not number)
- kermit
- set line /dev/tty
- send prcreport (whatever the name of file is)

When done downloading, type exit or quit to get out of C-Kermit

Will download to whatever is set up in the K-95 dialer.

The default location for K-95 download is as follows:

- click on start button
- go to Programs then Windows Explorer
- click on Windows Explorer
- C: should be highlighted
- Find K-95 folder – click on it
- The report will either be in that folder or in the download folder within the K-95.

After you are sure the report is there then just go to word, excel or whatever you want to pull the report up in and edit how ever you like.
